

## ADVANTAGE THROUGH MODERN TECHNOLOGY

„MADE IN GERMANY“ is a clear commitment for us as a medium-sized family business to our home base in Fürth. Since 1941, we have been developing and manufacturing our high-quality aluminium products exclusively in Germany. We attach great importance to modern and efficient production processes. Thanks to our many years of experience and proven innovations, we are known worldwide for developing and manufacturing high-quality products that precisely meet our customers' requirements. Gmöhling stands for high-class quality and outstanding durability.

Design, development and production in Germany is still feasible today. With us, you will find highly qualified and internationally experienced employees, creative minds in the development and 3D-design department as well as experienced staff in administration and production.

It is no coincidence that our export share is more than 50%, even to countries known for low-cost production.

Flexibility, quality, adherence to deadlines and efficiency are the four pillars on which we base our company and the principles according to which we work. Always focused on the future, we impress our customers with our confidence, competence and performance. We complete this mission through cooperation within a competent and highly committed team.

## SPECIAL SOLUTIONS

### YOUR CONCERN IS OUR CHALLENGE - CUSTOMISED SOLUTIONS

We are aware that every work process has different needs that cannot always be covered by standard.

Here we present examples of completed projects that we have successfully implemented thanks to our decades of experience.

Our product solutions are intended to inspire you and show that we can offer customized designs for your specific needs. Our core competence is the production of customized products.

Find out more here!

## INTRALOGISTICS

### FUTURE-ORIENTED LOGISTICS SOLUTIONS FOR EFFICIENT WORKING ENVIRONMENTS

With Gmöhling's innovative product solutions for logistics and intralogistics, time-consuming processes are a thing of the past. We bring logic to the world of logistics, optimizing the efficiency of your workflows. This results in significant time and cost savings.

Our custom-made solutions are perfect for making maximum use of your storage capacities, whether in storage rooms or high-bay warehouses. They are ideal for in-house goods transportation as well as for transport by truck, wagon train or driverless transport systems (AGVs). We also support you in optimizing everyday work processes. Furthermore, we offer hazardous goods boxes, e.g. with an extinguishing system for the safe transportation of lithium batteries.

Find out more here!

## E-COMMERCE

### ERGONOMIC & EFFICIENT SOLUTIONS FOR FULFILLMENT

We offer customized solutions for storage capacities, transport and work cycles. Our innovative order picking, shelf and spring-loaded base trolleys are ideal for your order picking, returns management and e-commerce product distribution. Fast delivery and high flexibility in warehouse logistics are crucial. Our picking trolleys simplify both multi-order picking and batch picking.

We optimize your trolley with additional functions such as handles, ladders, scales, holders for drinks and scanners as well as docking points for industrial trucks. We have also thought of pushing aids to meet your specific requirements. This not only protects the health of your employees, but also saves you time and money.
