

## EU Regulation EG (Nr.) 1907/2006 for Registration, Evaluation, Authorization and Restriction of Chemicals (REACH)

---

### Subject: REACH Authorization List for Substance of Very High Concern

Dear Customer,

as per article 59 of the REACH regulation, substance which have been identified as Substance of Very High Concern: SVHC, are listed on the Reach Authorization list. These substances are known to have very negative impacts on human health or the environment. Substances on this authorization list may be subject to strict registration requirement if decided so by the EU Commission.

Article 31 (1) of the REACH regulation stipulate that suppliers of a substance or a preparation have to deliver a security data sheet to their customers, shall this substance as such or as part of a preparation be listed as SVHC.

Article 33 of the REACH regulation stipulate that suppliers of a manufactured product which contains at least 0,1%-(m/m) of SVHC, have to provide sufficient information to guarantee a safe use of the product and also at least publish the name of the SVHC.

As per article 3 Nr. 3 of the REACH regulations our products are to be defined as manufactured products. By the normal use of our products, no release of substance is intended.

To our current state of knowledge our products do not contain over 0,1%-(m/m) of any SVHC from the current REACH Authorization List. Therefore, the information duty as per article 33 of the REACH regulation does not currently apply to us.

Of course, we are checking regularly within our company the state of the REACH Authorization List and we will inform you, may any relevant changes occur.

We hope to have answered your question adequately.  
Do not hesitate to contact us may you require any further information.

Best regards  
Gmöhling Transportgeräte GmbH
